- Operated London's Greenlight Hub, providing in-person support for driver partners

PROJECTS

Project moo

- Created a platform to connect patients with healthcare providers, streamlining the appointment booking process
- Includes features such as full account management, public provider profiles and searchable listings, appointment booking based on availability, intake form customization, and more
- Developed with Django, HTML, CSS, JavaScript, PostgreSQL, and hosted on an AWS EC2 instance

EDUCATION

Western University *London, ON*
Bachelor of Science, Specialization in Computer Science *2014 – 2020*

INTERESTS AND EXTRACURRICULARS

I love sabre fencing, badminton, and photography! I was the Men's Sabre Captain for Western's Varsity Fencing team for two years, and UWO Badminton Club's VP Communications/Admin for four years. I took up photography two years ago to be able to capture memories for myself and others to enjoy and reminisce.
